

WOOD TOOLS (in Technology workshop)

1-You have to do different groups of students.

2-Teacher gives the students a list with words about wood topic. They have to look up the meaning of these words, for instance, the definition of each of them on internet, on the dictionary...

3- After that they give the teacher these definitions, he has to read one of them and they have to go to the tool pannel in order to pick up the tool which the teacher has read its definition.

4- The team which get right tool wins one point. After finishing all words the team which has got more score wins.

For instance:
