

WONDERS OF SCIENCE

This is an age of science. Science has completely changed the entire world. Science has made our life more comfortable and trouble free. Science is useful to us. The blessings of Science are too many to count. Science has conquered time and distance. Electricity is another wonderful gift of science.

Electricity, one of its off shoots, is used in washing clothes, cooking food and in entertaining us. Its uses are unlimited. It lights our houses, shops, showrooms and streets. It runs our air-conditioners and air coolers. It keeps us warm in winter and cool in summer. It has increased our speed of work and has given us fast moving means of transport. Travelling is now so safe and fast. We have cars, buses, metro- rails, trains, ships and aero planes. Man can walk and talk at any corner of the world. In the fields of education, entertainment and agriculture it has proved a great blessing. The worst fact of science is seen in the wars.

It is a wonder that science has conquered deadly diseases, made man healthier and lengthened the span of human life. With the help of science, man has even reached the moon. Soon he will be visiting other planets too. There is no limit to the wonders of science. Scientists are coming out with new inventions and wonders every now and then.

The atom bomb and nuclear weapons are also wonders of science. As these can cause much destruction, it would be better for men to make constructive use of the wonders of science. Then only will they add to the happiness and prosperity of mankind. Science is a boon and a blessing for man if used in the right manner.
