

IES QUINTANA DE LA SERENA
ERASMUS + POLICY STATEMENT

Choice of partners:

- The partner countries that we would choose to implement the Erasmus programme with are those with companies or institutions which want to collaborate with us and welcome our students in the work placement.
- In addition to incoming and outgoing students, we thought of countries like France, Italy or Portugal for proximity and language similarity, as well as innovation in early childhood education.

Geographic area:

- Our initial objective is that mobility activities can be carried out with any country of the European Union. However, as stated above, we would prefer either a country whose language is in the same family as Spanish, or an English-speaking country, since our students learn this language in their curriculum.
- On the other hand we do not rule out making undertaking cooperation projects with other countries outside the European Union also.

The most important objectives that we set for this project are:

- To modernize and internationalize our high school, through direct contact with the partner countries.
- To ensure that our students learn the operation of companies in other countries.
- To learn about the educational and child care Child Education Sites techniques.
- To expand the employment opportunities for our students.
- To acquire and improve the management of foreign languages.
- To leave some input into the culture of other countries.

At this time our institution does not operate any cooperation project.

The strategy that we will follow when appropriate will be coordinated with the partner country with common objectives.

Increasing attainment levels to provide the graduates and researchers Europe needs:

- Our students will benefit from learning new and modern form of childcare and various teaching techniques, different from the ones used in our country.
- Our students will become familiar with healthcare (both physical and mental) systems, as well as social benefits and services systems of the host country.
- Our student will benefit from learning new marketing and sales techniques.

Improving the quality and relevance of higher education:

The possibility of Erasmus mobilities by our students and staff will guarantee an improvement in the quality of education in general.
